MEMORANDUM

To: Commander Dilworth

From: Sergeant Creech

Re: October 2025 Flock Audit

Date: October 29, 2025

As of October 27th, Lynnwood's Flock data was shared with the following agencies:

- Arlington PD
- East Wenatchee PD
- Edmonds PD
- Everett PD
- Kent PD
- Marysville PD
- Mill Creek PD
- Mountlake Terrace PD
- Mukilteo PD
- Puyallup PD
- Redmond PD
- Renton PD
- Sno911
- Snohomish County Sheriff's Office
- Sumner PD
- Sunnyside PD
- Tukwila PD
- Tulalip Tribal PD
- Yakima PD

Each of the above agencies had provided a signed Flock user agreement to the Lynnwood Police Department. I verified Lynnwood PD has retained copies of the signed agreements. As of October 29th, 2025, the data sharing privileges with the above agencies have been rescinded and Lynnwood Police is no longer sharing data with any outside agencies.

I conducted an audit of ten randomly selected inquiries between September 22nd, 2025 and October 22nd, 2025 in accordance with LPD Policy 462.6 FLOCK SAFETY CAMERA SYSTEM AUDITS.

LYNNWOOD WASHINGTON POLICE

The randomly selected inquiries included examples by Lynnwood personnel and outside agencies without a provided case number (or with zeroes as a placeholder).

I reviewed the searches performed by Lynnwood Police Department employees over a two-month period between August 22nd, 2025 and October 22, 2025. There were 2,414 searches conducted by 44 distinct Lynnwood Police Department users.

I reviewed the 2,414 searches for insufficient case numbers, incident numbers, or reason for the search. I discovered 159 searches with insufficient documentation (see attached). The searches either had no case/incident number listed, case numbers with zeroes for all of the digits, or a reference to an outside agency without further explanation. Many of the 159 network searches were duplicative and I reduced them down to approximately 45 insufficiently justified searches by ten distinct users.

Regarding duplicative searches, audits of the Flock system provide individual entries each time a variation of a plate is searched, or a search is conducted with different filters such as vehicle type, make, model, or color. As an example, a single felony theft (Lynnwood incident 25-28861) resulted in 46 searches of the Lynnwood network over a nineteen-day period. Officer Kelly, patrol officer taking the initial report, conducted nineteen. Detective Galloway conducted 24 inquiries after the case was assigned to him and Crime Analyst Curran conducted an additional three inquiries (see attached spreadsheet).

I reviewed the searches of the entire Lynnwood network over the same time frame: August 22nd, 2025 to October 22nd, 2025. In total, there were 15,182 searches conducted on our network by 17 different agencies (including Lynnwood PD). The other sixteen agencies using the network were from the approved list above. There were no network inquiries from Tulalip Tribal PD, East Wenatchee PD, or Sunnyside PD during the audit period.

Similar to the Lynnwood PD user accounts, I audited approximately 5,893 network searches by outside agencies across a one-month period (August 22nd, 2025 through September 21st, 2025) for insufficient documentation regarding case/incident number or the reason for search. I discovered 1,960 network searches (approximately 33% of the searches by outside agencies) did not include an associated case/incident number or proper documentation for search justification.

LYNNWOOD WASHINGTON POLICE

Lastly, I audited the user accounts associated with the Lynnwood Police Department. Each account was associated with an active employee. The accounts of employees who had recently separated from the department, such as Officer Cael Byrd and Student Officer Daniil Shirmedov, were appropriately deactivated. There were no anomalies or issues with the user permissions.

Recommendations:

Due to the 45 instances in a two-month period of Lynnwood personnel conducting searches with insufficient documentation, I recommend additional training and supervision to ensure accountability and establish a practice of requiring case/incident numbers and an acceptable reason on every search.

Additionally, LPD Policy § 462.6 regarding Flock audits requires the case or incident number be included in the audit documentation. However, policy §462.3 ALPR OPERATION states:

“ALPR shall only be used for official and legitimate law enforcement business. It may be used in conjunction with any official department operation or investigation.”

It does not specify in department policy the user *must* include an incident or case number. Similarly, policy 462.5(a) ACCOUNTABILITY AND SAFEGUARDS states:

“Persons approved to access ALPR data under these guidelines are permitted to access the data for legitimate law enforcement purposes only, such as when the data relate to a specific criminal investigation or department-related civil or administrative action.”

I recommend LPD policy is updated to impose an obligation for the person conducting the search to include a case or incident number when the search is conducted. If no incident or case exists, the user should be required to create an incident in New World with sufficient information to explain the legitimate law enforcement purpose.
